

## Dolgin Debuts 4-Position and 2-Position Battery Chargers for Fuji NP-W126S batteries

October 1, 2019

**Lexington, MA** – Dolgin Engineering, a leading provider of fast multi position battery chargers and DC power adapters, announces the release of new Four and Two-position battery chargers for Fuji NP-126S batteries.

Designed for busy video production studios and rental facilities, the units are designed to provide fast, reliable charging of multiple NP-126S camera batteries for both in-house and field use.

According to company president Alex Dolgin, "Due to the great success of our TC400, TC40 and TC200 charger lines, we've responded to numerous requests for a multi-position charger for the NP-126S batteries".

The TC400, TC40 and TC200 chargers incorporate a host of key features including:

- Fast, safe simultaneous charging of NP-126S and compatible packs.
- Digital LCD display (TC400 and TC200i models) indicating battery pack capacity.
- Charge status indication. As a battery being charged, (TC400 and TC200i) charge status is displayed in Volts, Ah, and percentage of charge.
- Each of the channels is independent of the other.
- Worldwide 100-240V AC power.
- Solid metal construction.
- Warranty 2 years parts and labor.
- Designed and manufactured in the USA.

The battery chargers also feature a highly efficient smart charging circuit. "It takes only about 2.5-3 hours to charge a NP-126S battery pack. The pack can be left on the charger after the charge is complete," said Dolgin.

Product	TC400 Fuji NP-126S	TC40 Fuji NP-126S	TC200 Fuji NP-126S	TC200i Fuji NP-126S
Positions	4	4	2	2
Charging	Simultaneous, independent	Simultaneous, DPM	Simultaneous, DPM	Simultaneous, independent
Diagnostic display LCD (battery state of charge, voltage, capacity) reporting				
Test Discharge Module (optional)				
USB Charging port				
Charge time for 3100 mAh battery	Approx. 2.5 hours (all 4 positions)	Approx. 3 hours (all 4 positions)	Approx. 3 hours (both positions)	Approx. 2.5 hours (both positions)
